Python executable for uploading files to contentful.
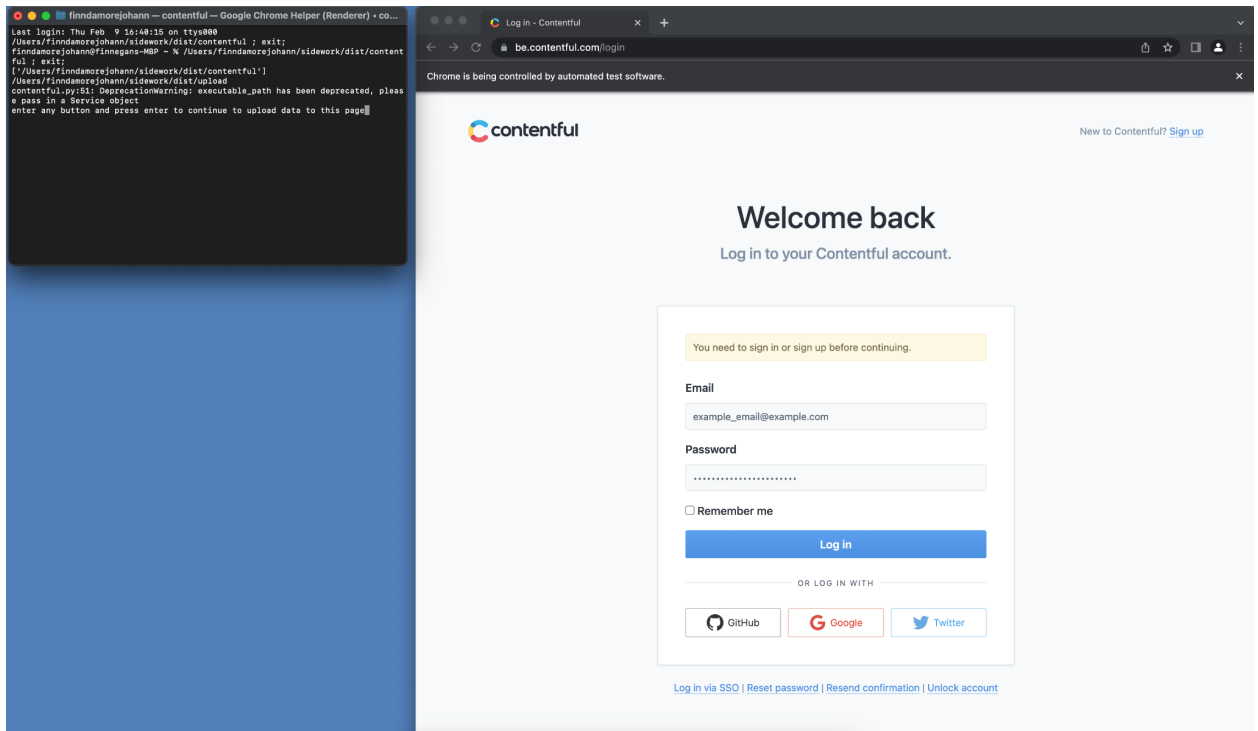

HOW TO USE:

1. Make sure within upload folder are all your files you with to upload to contentful
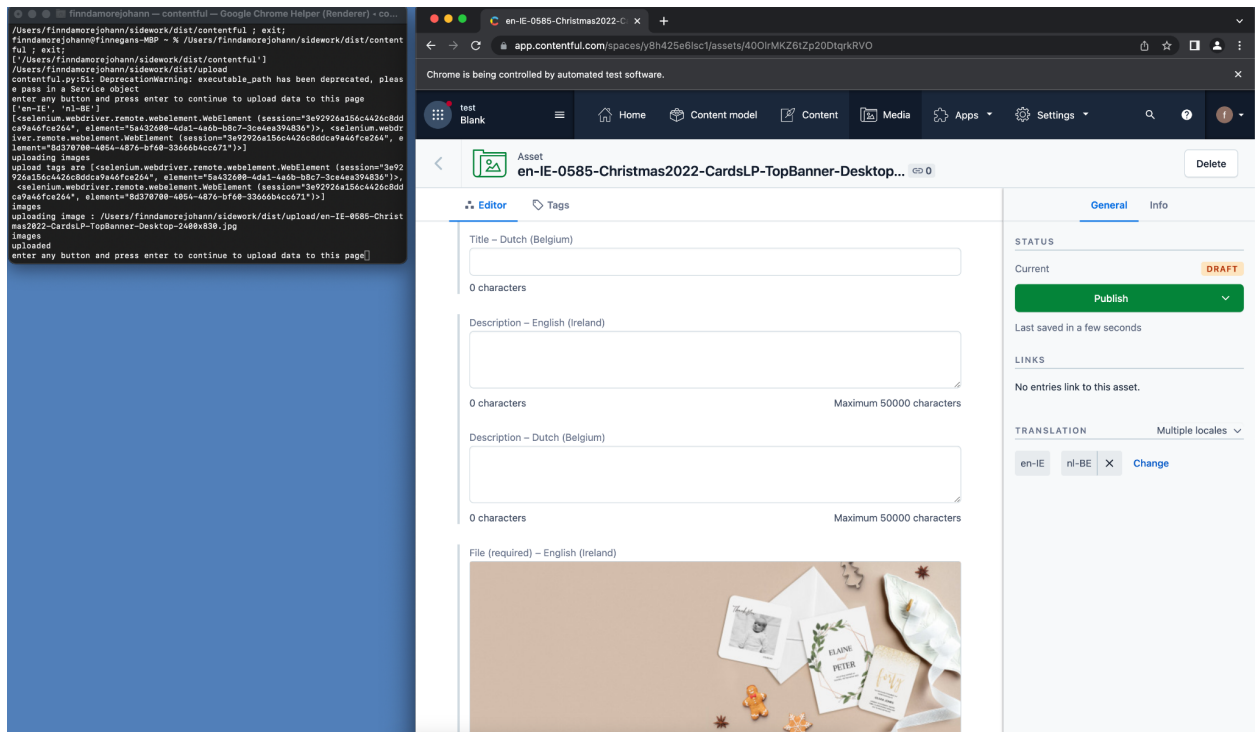

2. Double click on contenful executable

3. Both a terminal window and Chrome window will open. Login into Contentful.com

4. Navigate to media->whatever asset/project you are working on. Add any translations you want for the Asset

5. Return to terminal.Terminal will read 'enter any button and press enter to continue to upload data to this page'. Hit enter, and asset/project will be filled with media from 'upload' folder.

6. Repeat steps 4-6, replacing media in 'upload' folder, and switching to any other asset/project you with to fill.
